About Me

I'm Hussein Abbas, a 17-year-old Full-Stack Web Developer and high school student from Baghdad, Iraq. I have experience in programming and web development. I have completed Full-Stack Web Development and Artificial Intelligence courses, worked as an Assistant Trainer at Aon Academy, and participated in coding hackathons, bootcamps, and workshops. I am passionate about programming and helping others start their journey in technology.

Education

Al-Miraj School – Baghdad, Iraq
High School Student | Expected Graduation: 2026–2027

Experience

Trainer Assistant – Aon Academy

Programming Fundamentals Course | December 2025 – January 2026 – 10 students
Full-Stack Web Development Course | March 2026 – May 2026 – 35 students

- Assisted instructors in supporting students throughout both programming courses.
- Provided technical guidance in HTML, CSS, React, Node.js, and databases during the Full-Stack Web Development course.
- Organized meetings with students to explain difficult concepts, answer programming questions, and provide additional support.
- Reviewed and corrected students' test answers and provided guidance to improve their understanding.
- Managed student attendance and helped coordinate course activities.
- Developed communication, teaching, problem-solving, and technical skills through direct interaction with students.

Front-End Developer – Freelance

Ishtar Medical Technical Institute Website | 2025

Collaborated with another developer to redesign and rebuild the institute's website, implementing improvements and new features based on its requirements. Completed the project within one month.

Front-End Developer – Freelance

Supernova Hackathon – Participant 2025

- Participated in a collaborative hackathon focused on developing innovative technology-based solutions.
- Worked with a team to develop and present a practical solution within a limited timeframe.
- Gained experience in teamwork, problem-solving, and rapid prototyping.
